The State Teachers College will graduate a class of eighty-six at its annual commencement exercises which will be held Sunday, Monday and Tuesday, June 4, 5 and 6. B. degree. The remainder of the class will receive the 60-hour certificate.

Commencement week will start Sunday night when the baccalaureate sermon will be given at the Christian church. The sermon will be preached by the Rev. John F. Caskey of the Francis Street Methodist church of St. Joseph. Charles R. Gardner of the Conservatory of Music is arranging the musical part of the program.

There will be no class day exercises this year. Instead the class is devoting all of its time to work on the class play, "Prunella." However, before the play Monday night the senior class president, Jay Puckett, will present the senior cane to the junior class. It is the duty of the junior president to receive this cane, but as that officer, Leston Webb, will not be in Maryville the cane will be received by Miss Ruth T. Jones, vice president of the class.

Also before the play, Miss Lucile Holmes, president of the graduating class, will present the class gift to the school. The gift this year will be a back exterior drop for the stage in the college auditorium. The stage is not equipped with a drop of this kind and it is difficult to portray outdoor scenes.

The play, "Prunella," is being directed by Miss Blanche Dow of the department of dramatics and there are twenty-one persons in the cast. The college orchestra will play between the acts of the play.

The graduation exercises will be held Tuesday morning at 10 o'clock in the college auditorium. The program will consist of special music, the address, and the presentation of the diplomas and certificates. Governor Arthur M. Hyde has been asked to deliver the address.

FIRST NUTRITION CLINIC CLOSED

THIRTEEN OF EIGHTEEN CHILDREN GREW HEAVIER

GAIN MORE THAN NORMAL

Were Given One Pint of Milk a Day —Two Gained Three Pounds Each

The results of the first nutrition clinic which has been held in the ward schools of Maryville during the past seven weeks by Mrs. Kathleen Hutchison and Miss Margaret Scully, county health nurses, shows that a remarkable gain has been made by thirteen children and that five children have failed to make any gains.

The school board supplied eighteen children of the ward schools with a pint of milk a day so that they could drink a glass of milk regularly at recess time, both in the morning and the afternoon of each day. The weights which have been recorded during the time show that thirteen children have gained more than normal weight.

Two of the children who did not gain weight did not have any physical defects. The failure in these two cases was attributed to the lack of proper kind of food and in three cases it was due to enlarged tonsils. The other thirteen children in the class made an average gain of about two pounds during the seven weeks of the clinic. This gain was larger than the normal child of this age should make. The children ranged in ages from eight to eleven years and the normal gain of children of these ages should be approximately sixteen ounces for this length of time.

The greatest gain made was three pounds and was made by two children. One child made a gain of two pounds during the time but lost that amount just before the class closed. The loss of weight was due to a severe tooth ache which the child had for two days.

SOPHS AND JUNIORS WON CLASS FIGHT

OVERPOWERED THE SENIORS AND FRESHMEN.

HELD AT COLLEGE FIELD

Captives Taken Out From One to Ten Miles and Did the "Walk Act" Back to Town.

The annual class fight of the Maryville High School came to a close last night with a decided victory for the sophomores and juniors, captained by Harold O'Banion, who were opposed by the seniors and freshmen, captained by Sam England. The battle royal took place on the football field at the State Teachers College. The opposing armies were drawn up and at 10 o'clock they closed in combat, which lasted for nearly an hour.

At first it seemed about a draw battle. Boys from all the classes groveled in the dust. The calls of seniors for their class mates and the juniors for their classmates floated up from the field. At first it was easy for either side to call one of its members when a brother was in distress and the thongs were tightening about his wrists or ankles. But the calls for the seniors grew in proportion and they grew more insistent, for the seniors and freshmen were gradually being overpowered and bound one by one.

At first about a half of the field was covered with the struggling groups but as the fight went on and the seniors and their amateur helpers were gradually tied up the struggling became confined to isolated groups.

When the last senior was bound they were dragged or carried one at a time to the tool shed at the southwest corner of the field, where they were loaded into motor cars and whisked away to the country. After being carried out for from one to ten miles the prisoners were set free and did the "one tie, two tie, telegraph pole" act back to town.

A large crowd of the townspeople were out to the football field to see the fight. Motor cars that had been stopped about the place lighted the field with their headlights. A number of interesting personal encounters took place. One of these was between Captain O'Banion and Ernest Pugh, a freshman. "Bun" had a lot better luck handling some of the big seniors than he did with the wiry freshman. It took about four juniors and sophomores to tie Ernest. And at that he got loose two or three times and the fight was to do over again.

Paul Blagg and Paul Robey, seniors, "worked" their captors, making them believe that they were bound hand and foot when in reality they had gotten loose. Then when the opportunity offered they broke away and were seen no more. Lavelle Smith also got away.

127,249 FORDS SOLD IN APRIL.

Ford Retail Sales His New High Mark.

According to a report just received from the Ford Motor Company, Detroit, a daily average of 5,210 retail sales of Ford cars and trucks had been reached by the close of April in the United States alone.

Ford sales of cars and trucks for the month, including both domestic and foreign, totaled 127,249. This establishes a new high record, exceeding the largest previous month, June, 1921, by 467.

The sale of Fordson tractors has also been steadily climbing. A total of 11,181 Fordsons were sold during April in the United States, a daily average of 469 having been reached by the end of the month. This gives the tractor a new high sales record, and shows 100 per cent increase over the best month in 1921.

The Ford Company is enjoying a banner year in all departments. Output of Ford cars and trucks for the year, according to present estimates, will exceed 1,100,000 which represents a 10 per cent increase over 1921.

The Ford factory at Detroit is now operating at full capacity, having a force of more than 40,000 men on the payroll. The scheduled output for May will probably reach 135,000 cars and trucks, which will be applied against orders approximately 165,000.

Despite the attempt of the factory and the twenty-three assembling plants in the United States to produce a sufficient number of cars to meet the unusually heavy demand, it has been impossible for Ford dealers in most cases to make immediate deliveries.—Adv.

W. C. T. U. Notes

Frances Willard said truly—"We believe that when coal in the mine and not in the grate will warm you; when flour in the barrel and not in the loaf will feed you; when wool on the sheeps back and not woven into cloth will clothe you; then public sentiment that is lying around loose and not gathered up through the electric battery of the ballot box or sent tingling along the wires of law, will change the ways of men."

Of twenty-one answers received form Mayors of large cities to a letter sent them asking as to the effect of prohibition on their respective communities, nineteen contained strong commendation of the dry law, and only two were unfavorable.

Nineteen unite in saying, that in spite of bootlegging, there has been a decrease in crime, better housing and clothing for the laboser and more effenciency and regularity in workman.

The majority of them say with J. C. Walton, Mayor of Oklahoma City, Okla., "Prohibition has greatly increased the health, happiness and prosperity of our community. Increased Saving deposits brought greater efficiency and steadier work by employers, decreased juvenile delinquency and made many more happy homes."

Warren G. Harding, President of the United States, says: "The liquor traffic was destruction of much that was precious in American life." In the face of so much evidence on that point what conscientious man would want to let his own selfish desires influence him to vote to bring it back. In another generation I belive that liquor will have disappeared from memory.

Henry Ford says:

"The price of no Ford product has ever been made on what it ought to cost to manufacture that product. We have always taken the price and worked back. Every price has been a challenge to ourselves. It has always been below the lowest cost we could figure out in advance."

And truly, Ford prices of today are a challenge to the manufacturing world. Never before in the history of the industry have the prices on the various Ford models been as low as they are now. Spring is here. Summer is on the way. Don't be cheated out of days, weeks, and maybe months of Ford car enjoyment simply because you delayed placing your order. Act now!

SAN JOSE SCALE HAS BEEN FOUND IN MARYVILLE

Kinnaird Says That It Must Be Combatted Early in the Spring—To Late Now

San Jose scale has been on four or five fruit trees in Maryville. This is the first of this infection which has been found in the county, according to Roy A. Kinnaird, county farm agent. It is too late this year to treat trees for this disease. It is treated in the early spring by spraying with a dormant spray solution of one gallon of lime sulphur solution mixed with seven gallons of water. This solution cannot be used after the leaves have come out on the trees as it is so strong that it would kill the leaves.

WOODSON SPURLOCK WINS RHODES SCHOLARSHIP.

In a letter received from J. Woodson Smith of Kansas City, formerly a resident of Maryville, he writes that his grandson, Woodson Spurlock of Plattsmouth, Nebr., has won the Rhodes Scholarship in the Oxford University of England in the St. John's College and will spend three years in that college in the study of law. In a contest held in February in Nebraska there were thirty-six students entered.

Mr. Smith writes: "I am a lineal descendant of Dr. John Woodson of England and so is Woodson Spurlock. And he graduated from the St. John's College in 1604 and became an eminent surgeon. He came soon after graduating to Jamestown, Va. From that date to the present time the name Woodson has been perpetuated in our family. My father's brother, Woodson, was an officer in the Mexican War and was killed near San Antonio, Texas, in 1845."

Roy Manley Got Two Wolves

Roy Manley captured two small wolves Sunday near the W. F. Hartman farm, says the Barnard Bulletin. Mr. Hartman had noticed a gray wolf which seemed to be very tame, allowing cars to pass within a short distance from her. A search was made for the den and two pups were found.

There seems to be a large number of wolves and foxes in this part of the county and adjoining counties that are making ravages into the sheepfolds and henhouses. A good wolf drive would, besides being interesting, probably get rid of a large number of wolves.

CROPS THROGHOUT COUNTY IN NEED OF MOISTURE

A Good Rain Would Almost Assure a Heavy Berry Crop—Fruit Prospects Good.

The State Teachers College will graduate a class of eighty-six at its annual commencement exercises which will be held Sunday, Monday and Tuesday, June 4, 5 and 6. Caskey of the Francis Street Methodist church of St. Joseph. Charles R. Gardner of the Conservatory of Music is arranging the musical part of the program.

There will be no class day exercises this year. Instead the class is devoting all of its time to work on the class play, "Prunella." However, before the play Monday night the senior class president, Jay Puckett, will present the senior cane to the junior class. It is the duty of the junior president to receive this cane, but as that officer, Leston Webb, will not be in Maryville the cane will be received by Miss Ruth T. Jones, vice president of the class.

Also before the play, Miss Lucile Holmes, president of the graduating class, will present the class gift to the school. The gift this year will be a back exterior drop for the stage in the college auditorium. The stage is not equipped with a drop of this kind and it is difficult to portray outdoor scenes.

The play, "Prunella," is being directed by Miss Blanche Dow of the department of dramatics and there are twenty-one persons in the cast. The college orchestra will play between the acts of the play.

The graduation exercises will be held Tuesday morning at 10 o'clock in the college auditorium. The program will consist of special music, the address, and the presentation of the diplomas and certificates. Governor Arthur M. Hyde has been asked to deliver the address.

FIRST NUTRITION CLINIC CLOSED

THIRTEEN OF EIGHTEEN CHILDREN GREW HEAVIER

GAIN MORE THAN NORMAL

Were Given One Pint of Milk a Day —Two Gained Three Pounds Each

The results of the first nutrition clinic which has been held in the ward schools of Maryville during the past seven weeks by Mrs. Kathleen Hutchison and Miss Margaret Scully, county health nurses, shows that a remarkable gain has been made by thirteen children and that five children have failed to make any gains.

The school board supplied eighteen children of the ward schools with a pint of milk a day so that they could drink a glass of milk regularly at recess time, both in the morning and the afternoon of each day. The weights which have been recorded during the time show that thirteen children have gained more than normal weight.

Two of the children who did not gain weight did not have any physical defects. The failure in these two cases was attributed to the lack of proper kind of food and in three cases it was due to enlarged tonsils. The other thirteen children in the class made an average gain of about two pounds during the seven weeks of the clinic. This gain was larger than the normal child of this age should make. The children ranged in ages from eight to eleven years and the normal gain of children of these ages should be approximately sixteen ounces for this length of time.

The greatest gain made was three pounds and was made by two children. One child made a gain of two pounds during the time but lost that amount just before the class closed. The loss of weight was due to a severe tooth ache which the child had for two days.

SOPHS AND JUNIORS WON CLASS FIGHT

OVERPOWERED THE SENIORS AND FRESHMEN.

HELD AT COLLEGE FIELD

Captives Taken Out From One to Ten Miles and Did the "Walk Act" Back to Town.

The annual class fight of the Maryville High School came to a close last night with a decided victory for the sophomores and juniors, captained by Harold O'Banion, who were opposed by the seniors and freshmen, captained by Sam England. The battle royal took place on the football field at the State Teachers College. The opposing armies were drawn up and at 10 o'clock they closed in combat, which lasted for nearly an hour.

At first it seemed about a draw battle. Boys from all the classes groveled in the dust. The calls of seniors for their class mates and the juniors for their classmates floated up from the field. At first it was easy for either side to call one of its members when a brother was in distress and the thongs were tightening about his wrists or ankles. But the calls for the seniors grew in proportion and they grew more insistent, for the seniors and freshmen were gradually being overpowered and bound one by one.

At first about a half of the field was covered with the struggling groups but as the fight went on and the seniors and their amateur helpers were gradually tied up the struggling became confined to isolated groups.

When the last senior was bound they were dragged or carried one at a time to the tool shed at the southwest corner of the field, where they were loaded into motor cars and whisked away to the country. After being carried out for from one to ten miles the prisoners were set free and did the "one tie, two tie, telegraph pole" act back to town.

A large crowd of the townspeople were out to the football field to see the fight. Motor cars that had been stopped about the place lighted the field with their headlights. A number of interesting personal encounters took place. One of these was between Captain O'Banion and Ernest Pugh, a freshman. "Bun" had a lot better luck handling some of the big seniors than he did with the wiry freshman. It took about four juniors and sophomores to tie Ernest. And at that he got loose two or three times and the tight was to do over again.

Paul Blagg and Paul Robey, seniors, "worked" their captors, making them believe that they were bound hand and foot when in reality they had gotten loose. Then when the opportunity offered they broke away and were seen no more. Lavelle Smith also got away.

127, 249 FORDS SOLD IN APRIL.

Ford Retail Sales His New High Mark.

According to a report just received from the Ford Motor Company, Detroit, a daily average of 5,210 retail sales of Ford cars and trucks had been reached by the close of April in the United States alone.

Ford sales of cars and trucks for the month, including both domestic and foreign, totaled 127,249. This establishes a new high record, exceeding the largest previous month, June, 1921, by 467.

The sale of Fordson tractors has also been steadily climbing. A total of 11,181 Fordsons were sold during April in the United States, a daily average of 469 having been reached by the end of the month. This gives the tractor a new high sales record, and shows 100 per cent increase over the best month in 1921.

The Ford Company is enjoying a banner year in all departments. Output of Ford cars and trucks for the year, according to present estimates, will exceed 1,100,000 which represents a 10 per cent increase over 1921.

The Ford factory at Detroit is now operating at full capacity, having a force of more than 40,000 men on the payroll. The scheduled output for May will probably reach 135,000 cars and trucks, which will be applied against orders approximately 165,000.

Despite the attempt of the factory and the twenty-three assembling plants in the United States to produce a sufficient number of cars to meet the unusually heavy demand, it has been impossible for Ford dealers in most cases to make immediate deliveries.—Adv.

W. C. T. U. Notes

Frances Willard said truly—"We believe that when coal in the mine and not in the grate will warm you; when flour in the barrel and not in the loaf will feed you; when wool on the sheeps back and not woven into cloth will clothe you; then public sentiment that is lying around loose and not gathered up through the electric battery of the ballot box or sent tingling along the wires of law, will change the ways of men."

Of twenty-one answers received form Mayors of large cities to a letter sent them asking as to the effect of prohibition on their respective communities, nineteen contained strong commendation of the dry law, and only two were unfavorable.

Nineteen unite in saying, that in spite of bootlegging, there has been a decrease in crime, better housing and clothing for the laborer and more effenciency and regularity in workman.

The majority of them say with J. C. Walton, Mayor of Oklahoma City, Okla., "Prohibition has greatly increased the health, happiness and prosperity of our community. Increased Saving deposits brought greater efficiency and steadier work by employers, decreased juvenile delinquency and made many more happy homes."

Warren G. Harding, President of the United States, says: "The liquor traffic was destruction of much that was precious in American life." In the face of so much evidence on that point what conscientious man would want to let his own selfish desires influence him to vote to bring it back. In another generation I belive that liquor will have disappeared from memory.

MRS. SARAH WOLCOTT.

Returned From St. Louis

Mrs. Marion Smith and Miss Nina Bowman of Quitman returned last night from St. Louis, where they had been to attend the state Rebekah meeting. At the close of the sessions they remained in the city for a short visit.

Henry Ford says:

"The price of no Ford product has ever been made on what it ought to cost to manufacture that product. We have always taken the price and worked back. Every price has been a challenge to ourselves. It has always been below the lowest cost we could figure out in advance."

And truly, Ford prices of today are a challenge to the manufacturing world. Never before in the history of the industry have the prices on the various Ford models been as low as they are now. Spring is here. Summer is on the way. Don't be cheated out of days, weeks, and maybe months of Ford car enjoyment simply because you delayed placing your order. Act now!

SAN JOSE SCALE HAS BEEN FOUND IN MARYVILLE

Kinnaird Says That It Must Be Combatted Early in the Spring—To Late Now

San Jose scale has been on four or five fruit trees in Maryville. This is the first of this infection which has been found in the county, according to Roy A. Kinnaird, county farm agent. It is too late this year to treat trees for this disease. It is treated in the early spring by spraying with a dormant spray solution of one gallon of lime sulphur solution mixed with seven gallons of water. This solution cannot be used after the leaves have come out on the trees as it is so strong that it would kill the leaves.

WOODSON SPURLOCK WINS RHODES SCHOLARSHIP.

In a letter received from J. Woodson Smith of Kansas City, formerly a resident of Maryville, he writes that his grandson, Woodson Spurlock of Plattsmouth, Nebr., has won the Rhodes Scholarship in the Oxford University of England in the St. John's College and will spend three years in that college in the study of law. In a contest held in February in Nebraska there were thirty-six students entered.

Mr. Smith writes: "I am a lineal descendant of Dr. John Woodson of England and so is Woodson Spurlock. And he graduated from the St. John's College in 1604 and became an eminent surgeon. He came soon after graduating to Jamestown, Va. From that date to the present time the name Woodson has been perpetuated in our family. My father's brother, Woodson, was an officer in the Mexican War and was killed near San Antonio, Texas, in 1845."

Roy Manley Got Two Wolves

Roy Manley captured two small wolves Sunday near the W. F. Hartman farm, says the Barnard Bulletin. Mr. Hartman had noticed a gray wolf which seemed to be very tame, allowing cars to pass within a short distance from her. A search was made for the den and two pups were found.

There seems to be a large number of wolves and foxes in this part of the county and adjoining counties that are making ravages into the sheepfolds and henhouses. A good wolf drive would, besides being interesting, probably get rid of a large number of wolves.

CROPS THROGHOUT COUNTY IN NEED OF MOISTURE

A Good Rain Would Almost Assure a Heavy Berry Crop—Fruit Prospects Good.

The crops in general throughout the county are in need of rain, according to Roy A. Kinnaird, county farm agent. He said that a number of the farmers have remarked that they do not expect their corn which they have planted to come up until a rain comes.

Prospects for a good fruit crop for this year are good in every line. Perhaps the pear crop will be lightest of any. A good rain just now would almost assure a good berry crop.
